Nomination for Waters
Important to Anadromous Fish

Region SOUTHEAST

USGS Quad Bering Glacier A-4

Anadromous Water Catalog Number of Waterway 192-30-10100-2020-3059-4004

Name of Waterway Porcupine Creek tributary ☐ USGS Name Arct 6052 ☐ Local Name

☒ Addition ☐ Deletion ☐ Correction ☐ Backup Information

For Office Use

Nomination # <u>01 082</u>	<u>J. Anderson</u>	<u>2-06-01</u>
Revision Year: <u>2001</u>	Regional Supervisor	Date
Revision to: Atlas <u>X</u> Catalog <u>X</u>	<u>E. L. Wain</u>	<u>2/27/02</u>
Revision Code: <u>A-2</u>	AWC Project Biologist	Date
	<u>2. Arone</u>	<u>3/11/02</u>
	Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	5/31/00		3		<input checked="" type="checkbox"/>
DV	5/31/00		3		<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: On May 31, 2000 minnow traps were set at the proposed site of a V-notch log stringer bridge where the 1000 ML road was to be constructed. Juvenile coho and Dolly Varden char were captured at the site. A small pond is located just downstream of the site and showed signs of old beaver dam activity. Upstream of the LSB site, the stream reaches about 600 feet before a vertical block prevents upstream fish passage. Downstream of the beaver dam the stream parallels Porcupine Creek a short distance before entering it.
